

## Galectin-3 Mouse Monoclonal Antibody(16E6)

Catalog TDY561C TDY561F

Tel: 010-80117836

Web: [www.tdybio.com](http://www.tdybio.com)

Quantity 50μL 100μL

Entrez-Gene ID#3958 , Swiss-Prot Acc.#P17931

**For research use only.**

| Applications | Species Cross-Reactivity | Molecular Weight | Isotype |
|--------------|--------------------------|------------------|---------|
| IHC,ELISA    | H                        | ~26KD            | IgG1    |

**Storage Buffer & Condition:** PBS, pH 7.4, containing 0.02% **sodium azide** as Preservative and 50% Glycerol.  
Store at **-20°C. Do not aliquot the antibody.**

**Recommended dilutions:** IHC: 1:100-200 ELISA:1:10,000-50,000

**Optimal dilutions should be determined by the end user.**

**Specificity:** Antibody can detects endogenous Human Galectin-3 protein.

**Alternative Names:** 35KD lectin, CBP35,GBP,IgE-binding protein, L31,Laminin binding protein,Lectin L29

**Background:** Galectin 3 is one of the more extensively studied members of this family and is a 30 kDa protein. Due to a C-terminal carbohydrate binding site, Galectin 3 is capable of binding IgE and mammalian cell surfaces only when homodimerized or homooligomerized. Galectin 3 is normally distributed in epithelia of many organs, in various inflammatory cells, including macrophages, as well as dendritic cells and Kupffer cells. The expression of this lectin is up-regulated during inflammation, cell proliferation, cell differentiation and through trans-activation by viral proteins.
